

INTEGRATING RESTORATIVE PRACTICES TO STRENGTHEN PBIS IMPLEMENTATION

“All humans are hardwired to connect. Just as we need food, shelter and clothing, human beings also need strong and meaningful relationships to thrive.” - International Institute for Restorative Practices

You are invited to an interactive session focused on integrating **Restorative Practices** into existing Positive Behavior intervention and Supports (**PBIS**) framework, across all tiers. Throughout the session, attendees will engage with current work and best practices, explore relevant Ed. Code, and discuss future direction and implementation. This is an opportunity to enhance your teams current knowledge around Restorative Practices as it relates to PBIS, and further grow your collective efficacy in order to better support your learners and community.

SUGGESTED AUDIENCE:

Any County, District, or School staff member engaged with implementing Positive Behavior Interventions and Supports as well as exploring or integrating Restorative Practices in school communities and classrooms. All roles welcomed.
